## DETAILED ACTION

### *Response to Amendment*

1. Applicant's amendment filed Mar 14, 1998 have been fully considered but they are moot in view of the new ground(s) of rejection.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 1-37 are rejected under 35 U.S.C. § 102 [e] as being unpatentable over Foley et al [5,706,502]

As per claim 1, Foley et al taught *a web page program or Java program [col 4 line 30] residing in the memory, downloading a web page program or Java program such as portfolios [col 4 line 3] comprising text portion and a plurality of page component references or URL links [col 7 line 28-60] , the computer program displaying the text portions of the web page file such as the icons or menus contain the tittle or text links to web document [col 6 line 43] ; and computer program dynamically prompting or automatically download a user to select which of said plurality of page components [col 5 line 3] associated with the plurality of page component*

Art Unit: 2756

*references to download when downloading and integrating into the displayed text portions of the web page file* [col 4 line 5]. By this rationale claim 1 is rejected.

As per claims 2 and 3, Foley et al taught *computer program comprises a web browser application* [col 4 line 59], and *file comprises a hypertext markup language (HTML) document* [col 10 line 37]. By this rationale claims 2,3 are rejected.

As per claim 4, Foley et al taught *the component download selection mechanism dynamically creating a component download selection list when said file with said plurality of page components is download* such as icon representing the applet [col 4 line 25, 30-45, col 7 line 28-60]. By this rationale claim 4 is rejected.

As per claim 5, Foley et al taught *computer program comprises a web browser and wherein the text portions of the web page file are displayed in a first pane of said web browser said component download selection list is formed in a second pane or second portfolio* [col Fig 6] *of said web browser as design by choice*. By this rationale claim 5 is rejected.

As per claim 6, Foley et al taught *the component download selection list is formed in a dialog box* [col 5 line 65]. By this rationale claim 6 is rejected.

As per claim 7, Foley et al taught *the component download list is displayed to the user with said text portions of the web page file* such as portfolio file [col 8 line 3]. By this rationale claim 7 is rejected.

As per claim 8, Foley et al taught *component download selection list contains the file name for each of said plurality of page components* [col 4 line 54]. By this rationale claim 8 is rejected.

Art Unit: 2756

As per claim 9, Foley et al taught *component download selection list contains the type for each said plurality of components* [col 5 line 48]. By this rationale claim 9 is rejected.

As per claim 10, Foley et al taught *component download selection list contains the size of each said plurality of page components* as the inherent feature of file manager [col 4 line 4]. By this rationale claim 10 is rejected

As per claim 11, Foley et al taught *component download selection list includes a status item* or icon specification [col 6 line 41] *said status item dynamically displaying the amount of each of said plurality of page components that has been downloaded* [col 3 line 4-8]. By this rationale claim 11 is rejected.

As per claim 12, Foley et al taught *status item includes the percentage of a page component downloaded* such as the inherent feature of Run, Copy or Import submenu [col 6 line 63]. By this rationale claim 12 is rejected.

Claims 13-35 contain the same limitations that were addressed in rejecting claims 1-12 above. By the same rationale applied above, claims 13-35 are rejected.

As per claim 36, Foley et al taught *a web browser program* or HTML or Java program [col 4 line 30] *residing in the memory, including a download mechanism or dynamically creating or prompting or downloading* [col 5 line 3] *a web page file or list or HTML document comprising text portion and a plurality of page components references or URL links* [col 4 line 28, 49] such as a menu or sub menu [col 7 line 8, 56] *said component download selection mechanism prompting a user to select which of said plurality of components* on the download selection list to download and integrate with the display text portion of the web page [col 2 line

Art Unit: 2756

63-65-col 3 line 1-3, 25,col 4 line 5, col 13 line 21]; request from web server select embedded component such as a menu or submenu [col 7 line 8, 56].By this rationale claim 36 is rejected.

As per claim 37, Foley et al taught *a web browser program* or HTML or Java program [col 4 line 30] *residing in the memory, including a selection download mechanism or parsing or prompting* or downloading [col 5 line 3] HTML or Java program for text portions and for a plurality of embedded components such as or reference links or URLs [col 4 line 28, 49]; display the text portions or menu or sub menu [col 7 line 8, 56]; *prompting a user to select which of said plurality of embedded components to download by displaying a component download selection list with a plurality of references* [col 2 line 63-65-col 3 line 1-3, 25,col 4 line 49-51, col 5.line 5,24,46,53]; *receiving at least one user selected reference that the user is requesting be downloaded; downloading the embedded components associated with said at least one user selected reference that the user is request from said web server* [col 5 line 33-49, col 10 line 51-60]; *integrating the downloaded embedded components with the displayed text portions* [col 2 line 63-65-col 3 line 1-3, 25, col 4 line 5, col 13 line 21]. By this rationale claim 37 is rejected.

### ***Conclusion***
